

BIOMETRIC TIME ATTENDANCE

PRODUCT FEATURES

- Combines several authentication types (Fingerprint, pwd and card as per product specs)
- Real time monitoring of access status in Online systems
- Eliminates Proxy Punching
- Security with advanced fingerprint matching
- High Performance, Scratch resistant optical scanner

NAC-3000R

NAC-3000R™ is an advanced product organically combined and optimized with fingerprint recognition algorithm, optical sensors, embedded design technology, and software application technology. In addition, unlike other existing access control systems that use passwords or ID cards only, it is free from such risks as loss of password and duplication of card, providing excellent convenience and security. It is designed to maximize operational efficiency, enabling integrated monitoring and systematic management of terminals which have been operated independently on a remote location via the network.

TIMESCAN

TimeScan v1000 is a feature rich standalone, robust, cost effective, fingerprint recognition based Time attendance recorder and Access controller. It is suitable for medium and large offices, branch, factory or site. TimeScan is ready to use, easy to install device. TimeScan support advanced and fast TCP/IP LAN networking and plugs directly into network hub/switch. TimeScan has its own IP address and can communicate with central server anywhere in the network. It can be accessed from internet also in case fixed IP address is assigned. It can register, store, match fingerprints and send transaction log records to the central server. In case server is not available it can backup logs in its memory.

BIOACCESS

BioAccess is a compact standalone, low cost, fingerprint recognition based TimeAttendance Recorder and Access controller. It is suitable for small and medium office, factory or site. BioAccess is ready to use, easy to install device. BioAccess can register, store, match fingerprints and save transaction log records in its memory. Log records can be later downloaded to computer through RS232 port for generating and printing reports. BioAccess allow you to attach Door exit switch and EM/Strike lock.

ISCAN V100

iScan v100 is a compact standalone, low cost, fingerprint recognition based Access controller and Time attendance recorder. It is suitable for small offices, factory or site. iScan is ready to use, easy to install device. iScan can register, store, match fingerprints and save transaction log records in its memory. Log records can be later downloaded to computer for generating and printing reports.

Just Press Enter key and place you Finger for Hi-Speed advanced 1:N Identification matching. Within seconds your fingerprint is identified and access granted. iScan can be attached to standard Electric Strike or Electromagnetic locks. iScan can register upto 100 fingerprints.
